

## Reduced Resistance Tees (RRT)

Unique five-pronged design, significantly reduces the contact area between the golf ball and the tee. At impact, this small degree of contact reduction or resistance results in increased accuracy and distance.

## Eco Endurance Tees

Eco Endurance Tees are made from an eco friendly resin. This tee looks like a traditional golf tee but that is where the comparison ends. Endurance tees will last 10 times longer than a traditional wood tee and can't mark your club head.
