Description

The Twist-Tee offers golfers a new dimension in adjustable tee height technology. A simple, easy twist of the threaded shaft positions the ball at the ideal height for any driver face. Features rugged, rubber-like compound construction for extreme durability. Available in dark blue and clear (white core).

Reduced Resistance Tees (RRT)

Unique five-pronged design, significantly reduces the contact area between the golf ball and the tee. At impact, this small degree of contact reduction or resistance results in increased accuracy and distance.
